

S. R. HARRISH

MCA – Generative AI | Python Developer | UI/UX | AI Tools Specialist
Chennai, India | harrish20092005@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate (CGPA: 9.58) currently pursuing MCA in Generative AI at SRM University. Proficient in Python with working knowledge of HTML, CSS, and UI/UX design using Figma. Experienced in leveraging AI tools to accelerate development workflows and deliver smarter solutions. Built IoT projects using Arduino, completed an Android development internship, and presented research at a national conference. Seeking entry-level roles in Python Development, UI/UX Design, or AI-assisted product development.

TECHNICAL SKILLS

Languages	Python, HTML, CSS (working knowledge)
AI Tools	ChatGPT, GitHub Copilot, Gemini, Perplexity – integrated into daily development workflow
Design & UI/UX	Figma (wireframing, prototyping, UI design)
Development Tools	Visual Studio Code, Android Studio, Arduino IDE, GitHub
Platforms & Concepts	IoT, Deep Learning (exposure), Pose Estimation, Agile Basics, Prompt Engineering

EDUCATION

MCA – Generative AI (Master of Computer Applications) SRM University (RMP Campus), Chennai	2025 – 2027 Pursuing
B.Sc. Computer Science SRM University, Chennai CGPA: 9.58 / 10.0	2022 – 2025 Graduated

EXPERIENCE

Android Development Intern Spark Inventive Internship	Jul 2023 Completed
- Completed hands-on internship in Android application development, gaining practical exposure to mobile UI design and app logic. - Worked with Android Studio and core Android development principles including activity lifecycle and UI components.	
Event Coordinator – Debugging Competition SRMIST Ramapuram Science & Humanities Volunteering	Mar 2023 – Mar 2024 1 year
- Organised and managed the debugging competition at COMSCI 2023–2024, coordinating with participants, judges, and the organising team. - Ensured smooth event execution, handled troubleshooting, and encouraged problem-solving culture among participants.	

PROJECTS

Autonomous Advertising Rover	2024
Technologies: Python, Arduino, IoT, Embedded Systems GitHub Repository	

- Designed and built an Arduino-powered line-following rover with real-time obstacle avoidance using ultrasonic and IR sensors.
- Delivered an autonomous advertisement display system aimed at providing affordable marketing tools for small businesses.
- Won 3rd Prize at SRM IST Project Day 2024 — recognised for innovation in IoT and embedded systems.

Dynamic Online Trading Optimization System

2024

Technologies: Python, Data Analytics, Optimization Algorithms

- Developed an analytical model using Python to enhance dynamic pricing strategies for online trading platforms.
- Presented research at RTACT 2024 (National Conference), SIMATS Engineering — selected from competitive submissions.
- Applied optimization techniques to improve pricing accuracy and business revenue forecasting models.

CERTIFICATIONS

Introduction to Cybersecurity	Cisco Networking Academy Mar 2026
Deloitte Australia – Data Analytics Job Simulation	Forage Jan 2026
Deep Learning using OpenPose – Pose Estimation & AI Apps	Infosys Springboard 2023
The Joy of Computing using Python	NPTEL 2024
Android Development Internship	Spark Inventive Jul 2023

ACHIEVEMENTS & RECOGNITION

-
- 3rd Prize — Project Day 2024, SRM IST: Autonomous Advertising Rover recognised for innovation in IoT and embedded systems.
 - Research Paper Presented — RTACT 2024, SIMATS Engineering: Selected paper on dynamic online trading optimization and pricing strategies.
 - Runner-Up — Knack O Fest 2023 CS Quiz, SRM IST: Achieved runner-up in inter-college competitive computer science quiz.

CORE COMPETENCIES

Python Development • UI/UX Design • AI-Assisted Development • Prompt Engineering • IoT • Problem Solving • Team Leadership • Research & Analysis • Fast Learner • Adaptability
